Solution Correct Option - 4

Que. 6 **Direction: Choose the correctly spelt word.**

1. Pleasent
2. Pliesant
3. Plisaent
4. Pleasant

Solution Correct Option - 4

Que. 7 **Direction: Given below is a short passage followed by some items based on the passage. First, read the passage and answer the items based on it. You are required to select your answers based on the contents of the passage and the opinion of the author only.**

Nearly every night of our lives, we undergo a startling metamorphosis. Our brain profoundly alters its behavior and purpose, dimming our consciousness. For a while, we become almost entirely paralyzed. We can't even **shiver**. Our eyes, however, periodically dart about behind closed lids as if seeing, and the tiny muscles in our middle ear, even in silence, move as though hearing. We are stimulated, men and women both, repeatedly. We sometimes believe we can fly. We approach the frontiers of death. We sleep. Around 350 B.C., Aristotle wrote an essay, "On Sleep and Sleeplessness," wondering just what we were doing and why. For the next 2,300 years, no one had a good answer. In 1924 German psychiatrist Hans Berger invented the electroencephalograph, which records electrical activity in the brain, and the study of sleep shifted from philosophy to science.

How does our brain dim our consciousness?

1. by sleeping
2. by exercising alot
3. by extremely changing its behaviour
4. by using modern techniques

Solution Correct Option - 3

Que. 8 What was/were recorded by electroencephalograph?

1. all the magnetic activities in our brain
2. shivering of our body
3. all the electrical activities in our brain
4. sensitivity of our body

Solution Correct Option - 3
